

## Leoncino 500 Trail

**Leoncino 500 Trail**, the "all terrain" version of the modern-classic bike of Benelli, is a motorcycle designed for pure fun in all riding conditions, both on asphalt and on more difficult routes. A sporty two-wheeler, which for 2023 is proposed with a renewed aesthetic, even more dynamic and modern, thanks to new graphics, new tank bumpers now tone-on-tone and with an extremely captivating style and a new black color for the stylistic element of the arch drawn on the tank, which gives it elegance and sportiness. As for the road version, Leoncino 500 Trail is available for 2023 in a new color: dark matt gray.

Leoncino 500 Trail shares with the road version the 500 cc, two-cylinder, liquid-cooled four-stroke engine, now updated to the Euro 5 regulation, with a power of 47.6 hp (35 kW) at 8500 rpm and torque of 46 Nm (4.6 kgm) at 6000 rpm.

The frame is a steel tube trellis whose end is hidden beneath the tank. The headlight, in the typical arc shape, features LED technology, while the instrumentation is entirely digital. The bike also features the Lion graphic on the front mudguard, like all the other motorcycles in the range.

**Leoncino 500 Trail** features knobby Metzeler Tourance tyres on its aluminium alloy rims measuring 19" in the front and 17" in the back, and respectively fitted with 110/80-R19 and 150/70-R17 tyres. All this means maximum guarantee of stability and enjoyment in all conditions and on all terrains. The suspensions are adjustable: the front having an upside down fork with 50 mm diameter legs and the back a swinging arm with lateral shock and travel of 55 mm. For the braking system, on the front end we find a 320 mm diameter double disc with two-piston

floating callipers. On the back end a 260 mm diameter disc with single-piston calliper and ABS.

**Leoncino 500 Trail** will be available in red, dark matt gray, black and green colours starting from spring 2023.
