

## TRK 251

The small adventure bike of the Pesaro Company, the **TRK 251**, renews the look for 2022 and arrives on the market with new graphics and new colours, now sportier and more captivating and with some technical adjustments capable of improving its adventure spirit. Easy and agile handling, **TRK 251** offers a 250cc beating heart capable of taking on even the most difficult routes without ever overwhelming even novice and youngest riders.

The single-cylinder, four-stroke engine is liquid cooled, with double overhead camshaft timing system and electronic fuel injection, shared with the rest of the 250cc range and now updated to the Euro 5 standard. Its maximum power is 25,8 hp (19 kW) at 9250 rpm, with torque of 21,1 Nm (2.15 kgm) at 8000 rpm. The traditional steel tube trellis frame is able to offer maximum stability and ease of riding. The suspensions feature an upside-down fork with 41 mm diameter legs on the front and a rear swinging arm with central damper and 60 mm travel.

**TRK 251** features a braking system consisting of a single floating 280 mm disc with 4-piston calliper on the front and 240 mm with single-piston calliper on the back that can guarantee maximum road safety. ABS comes standard. The 17" aluminium alloy rims mount a 110/70 tyre on the front and 150/60 at the rear. The finishes have been revised, with updates regarding the saddle, more comfortable and spacious and the footrests.

**TRK 251** is offered in white, black and in the new colours yellow and grey.
